

Portrayal of Homelessness

Work in pairs and complete this definition of home, beginning with the words **Home is ...**

The media can have both positive and negative influences on homelessness. As a class, establish a group project on homelessness in Ireland. Divide into groups to organise the project. For example:
Some students research how homeless is portrayed in newspapers.

Some students research how the homeless are portrayed in TV.

Some students research different organisations that help the homeless in Ireland.

Some students interview different people about their attitudes to homelessness.

Organise an awareness day in your school.
Consider volunteering with some local groups that organise soup runs for the homeless.
